

José Daniel Mejía Jovel

Profile

I am a highly motivated front-end programming and design focused Systems Engineering student with a passion for creating exceptional user experiences as well as creating 3D models. During my academic training, I have been in charge of training myself in a self-taught way through the documentation that can be found publicly about the different tools that I use, my focus is always on the end user and on the creation of intuitive digital solutions. and functional.

Objectives

Improve design quality.

Update on technologies.

Collaborate with other professionals.

Continue expanding my knowledge through courses.

Skills

- Elaboration of 3d designs with Blender.
- Understanding of user interface design principles and user experience.
- Creation of logos using Gimp and Illustrator.
- Creation of web pages using HTML, CSS and JavaScript so that the user has a pleasant interface.
- Use of Bootstrap and flexbox for the design of web interfaces.

Certifications

CCNA: Introduction to Networks
